I'm in the process of hiring people to help me out, and the first thing I needed to do was figure out where I was spending my time.. How can I get my computer to stop timing out When you are off it for about 2 minutes it goes into time out and you have to put your password in to get it back on so can you tell me how to stop this from happening please.. Today Daniel Alm released Timing 2 for Mac, version 2 0 of his popular Mac productivity app.
